Dynamics

What's New In Dynamics CRM Solutions Manager?

---

Dynamics CRM Solutions Manager (DCSM) is a handy and reliable application designed to automate the process of importing and exporting CRM solutions between organizations. DCSM supports both managed and unmanaged solutions, allowing for a friendly exchange between the source and the target organization. It can import or export databases, XML files, or XML assets, import/export tables,

---

import/export or copy customer data from a Windows user account, and import or export configuration settings. DCSM integrates with Microsoft Office to provide an application user interface for users that are creating or modifying solutions and can be automated with Visual Studio solutions and C# scripts. DCSP Basic is a Microsoft Dynamics CRM (2007, 2010, 2013) add-in that provides a method to automate

---

the process of importing and exporting databases and associated files that belong to a Dynamics CRM deployment. DCSP Basic can import, export, and synchronize files and databases associated with the entire Dynamics CRM deployment including an entire instance of CRM. It supports the import/export of Microsoft SQL Server databases and Microsoft Access databases. Advantages of using DCSP Basic: The

---

ability to synchronize the source CRM deployment with the target CRM deployment. DCSP Basic is a Microsoft Dynamics CRM (2007, 2010, 2013) add-in that provides a method to automate the process of importing and exporting databases and associated files that belong to a Dynamics CRM deployment. DCSP Basic can import, export, and synchronize files and databases associated with the entire Dynamics CRM

---

deployment including an entire instance of CRM. It supports the import/export of Microsoft SQL Server databases and Microsoft Access databases. Advantages of using DCSP Basic: The ability to synchronize the source CRM deployment with the target CRM deployment. Deferred Data Capture and Migration can be easily performed using the inbuilt scheduling feature. There is a simple way to move CRM

---

databases to SQL Server.  
CALLBACK feature is available, which triggers the solution when an entity is updated. Support for multiple CRM databases The solution can easily export the configuration settings for CRM. Option to export attachments from CRM. Import/export users from the source CRM to the target CRM. Import/export solutions from one CRM environment to another CRM

---

environment. The Import/Export Wizard allows you to import or export any information between any two CRM deployments. The solution comes with a wizard to deploy CRM with either on-premise or cloud deployment. The solution provides with sample configuration for exporting, importing, and synchronizing CRM data. There is a built-in admin console that allows you to manage and schedule the

---

Import/Export process. During the import process, if any data is already

---
