What's New In?

For all those cursor lovers who loves the original balls of carrots that come with the default cursor theme, Parasite is made for you! Featuring smooth transparency, various colors, and even a few animations, Parasite is your very own type of carrot. Or, if you're a classic style lover, you may just simply enjoy the colors and text without the animations. Parasite Features: • Smooth Transparency • Various colored background options • A few different types of animations • Various Color transition options • Customizable cursor size and color • Full Undo support • Multiple type of colors • Multiple Skinned • Various Cursors Set • Multiple Sliders for each Cursor • Size options and colors! How to apply Parasite to your computer: • Extract the Parasite folder from the downloaded zip folder to your computer. • Open the folder you just extracted and follow the instructions below. • Launch CursorFX with admin rights, and run CursorFX as administrator. • Once launched, you will be presented with various options. Navigate to Preferences->Behavior Options->Parasite. • By default Parasite will be a dotted sized pointer. Change the pointer size by dragging one of the sliders. • Select Parasite from the dropdown box beside the pointer size slider. This will determine which Parasite skin you will use. • You can choose between different color values for the background and pointer by dragging the appropriate slider. Be sure to set the color to the color of your background image. • Drag and drop the Parasite folder from the Parasite folder to CursorFX in order to apply Parasite to your cursor. • Click on the CursorFX icon located on your task bar in order to apply Parasite to your computer. You should now have a Parasite pointer cursor. • If you want to change to a different theme, simply navigate to Preferences->Behavior Options->Importing Cursor Type, and import the desired cursor folder. If you have any questions, please do not hesitate to contact me at: YouTube: Support and Credits: • GitHub: • Google Plus Community:

System Requirements:

You will need a computer with at least a 2.4 GHz CPU (See below). In addition, you must have DirectX 9.0c or greater, and the game may not be patched. We cannot support running on older versions of Microsoft Windows, including Windows XP. Macintosh OS X: You must use Mac OS X 10.5.0, or 10.6. Supported Platforms: Windows 7 or later: OS X 10.5: PlayStation 4:
