**\*\*Photoshop Elements:\*\*** If you can't afford Photoshop, but want to try it out, consider buying Adobe Photoshop Elements. The program offers numerous tools and image editing features but lacks the full functionality found in Photoshop. After you spend some time using Photoshop Elements, you may want to move on to Photoshop, but I suggest that you do so slowly. I recommend starting out with Photoshop Elements 6 and using only Elements if you truly are not interested in creating and manipulating images. Photoshop Elements 6 is free and quite useful. When it's time to move up to Photoshop, Photoshop Elements 7 is available for just under \$200. Photoshop Elements 8 is not only a final leap to the full Photoshop program, but it also offers incredible features like the ability to create 3D objects. The advantages of Photoshop are so overwhelming, I recommend learning how to use the program for professionals before you purchase it. If you're serious about photography, consider getting a copy of Photoshop and learning how to use it well. Photoshop is the program of choice of the pros. You can also purchase third-party images, such as those from [www.stock-photos.com](http://www.stock-photos.com), to save money. One more drawback with image-editing software is that you need a fast computer to edit and maintain large images. If your computer is slow, image editing programs won't load as fast. PhotoMechanic and Photoshop Express ([www.photosedit.com/express](http://www.photosedit.com/express) and [www.photosedit.com](http://www.photosedit.com)) are examples of online image-editing programs. Online programs are useful because you can access these programs from anywhere in the world, and you don't need to install any software. ## Choosing a Retouching Service Even if you do your own retouching of your images, you still may want to work with a retouching service. When you hire a retouching service, you pay a company to retouch images for you and then send them back to you for you to frame or print. I use a retouching service all the time because I don't have time to retouch my own photos. I prefer working with an outside company because it's better for me to do my own retouching (as I explain in Chapter 11) than to rely on other people to do it for me. The big question is this: How much does a retouching service cost? One of the best ways to figure out

The impact of the cost-effectiveness of a programme for prevention of sexually transmitted infections in a developing country. The cost-effectiveness of prevention of sexually transmitted diseases (STDs) was evaluated in a programme implemented in Madagascar. Costs and effects were analysed based on a cost-effectiveness ratio from the point of view of the government. The study, a prospective cohort study, was conducted in two study sites. A cost-effectiveness analysis was carried out at the governmental level. From March to July 1996, we followed 535 people in the municipality of Ambilobe and the district of Ambohiparara, and an additional 25 participants in the district of Morondava. Participants were interviewed at baseline and after 6 and 12 months. These two districts represent two distinct socioeconomic levels of the region. In the two cohorts, respectively, 489 (92.5%) and 462 (87.0%) of the 535 participants were interviewed after 12 months. When the cost was set at 0, the same number of participants in the low socioeconomic (SE) district who would have developed the STD, as were treated, would have been treated for a total cost of 4,350,000 FNF (5,300,000 US\$) in the cost-effectiveness analysis. In the high SE district, the average cost per subject (0) would have been 7,714,000 FNF (9,800,000 US\$). The program has been found to be cost-effective if the epidemic of STDs in a developing country is considered a significant problem, as evidenced by the high level of STD prevalence in Madagascar.

09 Mar 2012, 22:20 I had a customer who was a widower and separated. He always said there were two women in his life and he was not a cuckold. Then one day, he asked me to leave on a weekend to go to stay with a couple for a long weekend. It was the first time I was his girlfriend for a long weekend and it felt good. So I agreed to go away. When we arrived at the hotel, he told me they were totally into each other and I didn't need to be worried. We stayed there for two days. The woman was 27 and the man was 40. They spent most of the time in bed together, either fucking and sucking each other or them having lesbian sex. They told me he was bisexual and they both enjoyed the other women they had been with, but she was

The present invention relates to a pet grooming apparatus and more particularly to a pet grooming apparatus and method of using the same, such as a hair removing device, for both grooming and shampooing the hair of a pet such as a cat and having a removable dryer unit which may be used with the apparatus, the device including a housing and a rotating brush for

dislodging hair from the pet. Various self-contained grooming apparatuses have been previously proposed for pet animals. For instance, U.S. Pat. No. 3,742,897 discloses a device for cleansing a pet animal having a rotatably mounted brush for brushing the pet animal over a perforated cleansing pad that is in turn mounted in a housing which contains the brush. The housing is mounted on an elongate handle which is positioned in the palm of the hand when the brush is in use. The device includes a separable dryer unit having a discharge opening spaced from the brush in the housing. The brush, the dryer unit, and the housing are, however, unitized and cannot be separated from one another so that the brush may be used as a dryer. U.S. Pat. No. 3,900,732 discloses a grooming and shampooing device for pet animals having a housing in which is mounted a rotatable brush and a drying unit that is mounted to the housing and which includes two discharge openings spaced from the brush for discharging either hot air or dry air to dry the hair of the pet. Again, the brush, housing, and the dryer unit are, however, unitized and cannot be separated from one another so that the brush may be used as a dryer. Another pet grooming apparatus is shown in U.S. Pat. No. 4,072,125 which discloses a combination hair shampooing and drying apparatus for pets having a housing that defines a cavity in which the brush is mounted for rotation. In this patent, a removable cleaning unit is placed in the housing at the time of use and the brush is used for shampooing the pet and the cleaning unit is then removed from the housing and placed in a dryer. U.S. Pat. No. 3,873,919 discloses a hair dryer having a rotatable brush mounted in the housing of the hair dryer for moving hair back and forth for the purpose of drying the hair of a pet. In U.S. Pat. No. 3,888,509
