By trimming the edges, you can remove unwanted objects on the edges like shadows, separations between objects, blurs, ghosts and white strips. Trimming the edges is the easiest way to remove the unwanted objects. To trim the edges, follow the steps below: With the Layers window open, select the scissors tool by holding the 'Shift' key and click anywhere on the edges. Move the mouse along the edges. Drag the mouse across to the desired destination. With the edges trimmed, you can use the Magic wand tool to select the trimmed portions and eliminate the gray blurs.
