About the soundtrack: The music was composed and produced for the game by musicians: \* Martin Donger, who has worked on titles like Bittersweet and all other games in the genre that contain heavy metal elements. \* David Schmid, leader of the band Hexenwulf and also leader of the project Deinit. \* Thomas Schmidt, guitarist for the band Bubukulcha and who also recorded a solo album: KOBOWLÖCK "FRUIT ROLLS". The soundtrack of the game is available for free download (in various formats), as long as the game is bought from the Steam Store. I made an error because a bundle containing the soundtrack was sent to me and I'm afraid that the original soundtrack ended up somewhere in the North Pole. If this happens, please contact me so we can work this out!Panc

What could possibly go wrong with the Double Laser? I give you... Mario and Luigi. Luigi is the Mario that spruces up the other games with goofy jiggly pears and mushrooms, whereas Mario gives Luigi more like plumber. I know, right? Yet, Double Laser is the company's attempt at merging them into one game. Two separate portions of the same game, you could say. There's no "main" game with the two, just a 2D puzzle platformer and a 3D action game. I think it will be good, but I know some gamers will not like it. How? Let's examine it a bit. Before you begin playing, a short cutscene takes place, and you see Bowser and his soldiers attacking the Luigi Shrine. To stop this, you need to rescue Luigi from a castle and find the way to defeat him. Then, Mario takes up the 3D gun that Luigi dropped. And yes, you do the controls at this point, in the same fashion as 3D Mario. Once the 3D gun starts to fire, a 2D puzzle map is created. The screen is split in half vertically, and you move Mario in the 2D world. Luigi from Mario games comes to life. And with this, we have a range of characters that can be interacted with. The box is a 2D puzzle game, wherein you need to figure out how to move Mario to collect all of the boxes. Like the 3D Mario titles, you control Mario as if he was a 2D character. There are 3 levels in this stage. There are boxes at the beginning that serve as the guide to how to move in this stage, and the boxes will increase in complexity as you go on. You must move from the top to the bottom. However, your character will move diagonally in this stage. If you don't know what this means, then you should find out about it before playing Double Laser. Once you've collected all the boxes, you must unlock the doors to the castle. You will come across enemies here, and it is here that Double Laser becomes more complicated. There's a selection of action items at your disposal, such as the Wing gun from Super Mario 64. These are new items that you won't find in previous Mario games. You can also control Mario from a more forward-flying position, like when playing Super Mario World. The 2D levels are fun and satisfying to play. However,
