It needs to call into a WPF page for a specific method (specifically, the BusyIndicator). How can I call the BusyIndicator.IsBusy property from the WinForms environment? EDIT: This needs to be cross-language, so no easy way of doing it in pure.Net. A: It's a case of marshalling between the.NET and WPF worlds using PInvoke. The relevant functions are described in the MSDN article "How to: Transfer a WPF Style to a Windows Forms Control". Drew Parsons also has a blog post describing how to do this, with a good example of how to do it with the BusyIndicator. K-State recalls players for fall camp By BT
