## Full ~UPD~WindowsLoaderv222byDaz

Hope you guys will enjoy the Full and HD 720p download free link.Q: Uncaught Error: nothing to repeat As described in the title, how can I correct this error? I'm trying to make the next button keep playing the audio. var sound = new Audio("preload.mp3"); var song = new Audio(); song.play(); function doit() { if (!song.paused) { var next = document.getElementById("next"); console.log(next); if (next) { next.removeAttribute('disabled'); } } } I tried to create a button using a tag, but I got an error where it said 'null' on the next.removeAttribute('disabled') line. A: I'm not sure what kind of element you're trying to play and I'm not sure why you are using getElementById to try and grab it, but I would take a look at using an array of elements to loop through and find a matching element with getElementsByName or querySelectorAll. I'm assuming you want to actually play the.mp3 file in the button's click handler. var playSound = function(sound){ var next; if (!sound.paused) { next = document.getElementById(sound.id); next.removeAttribute('disabled'); sound.play(); } }; var next = document.getElementsByName('next'); if (next && next.length > 0) { next[0].addEventListener('click', doit, false); } function doit() { if (!next[0].paused) { next[0].play(); } } }
