Drawings are portable and can be easily accessed regardless of the project. Some information, such as off-page connectors that are specifically linked to ... the drawing, will never be available. Information from external applications (not from the drawing file) will be displayed when the drawing reader is compatible with that device. Drawings cannot be exported to other formats. All drawings created in the same system (such as AutoCAD or Creo) will use the same libraries. This allows you to edit the same drawing in the same environment.
