this dump macos gives you access to everything that is stored on the iphone or ipad. all of your contacts, text messages, emails, call logs, photos, videos, downloads, etc. can be extracted from the affected devices. once extracted from the device, the information is automatically stored in a secure location on

your computer. if the device has been broken into, the dump enables you to examine the data and transfer it to your computer, so that you can view it later. this is the ultimate backup tool to protect yourself and your data from a hack. the toolkit is free for individual use. the ios forensic toolkit is available for \$75 (usd) for use by forensic professionals. the toolkit can be purchased from elcomsoft.com. the new, bootloader-based extraction method delivers repeatable results across extraction sessions. when using ios forensic toolkit on a supported device, the checksum of the first extracted image will match checksums of subsequent extractions provided that the device is powered off between extractions and never boots the installed version of ios in the meantime. when running ios forensic toolkit on a previously unlocked bootloader, the toolkit checks to make sure that the device is not running the ios version that has been installed. the toolkit checks the first extracted image for the presence of a non-expired lockdown record. in addition, the toolkit can search and recover data from locked bootloaders. the toolkit can be used to unlock encrypted iphone 4, 4s (1), 5 and 5c devices protected with an unknown screen lock passcode by attempting to recover the original 4-digit or 6-digit pin. this dfu attack works at the speed of 13.6 passcodes per second on iphone 5 and 5c devices, and takes only 12 minutes to unlock an iphone protected with a 4-digit pins. 6-digit pins will take up to 21 hours. a smart attack will be used automatically to attempt cutting this time as much as possible. in less than 4 minutes, the tool will try several thousand most commonly used passcodes such as 000000, 123456 or 121212, followed by 6-digit pins based on the dates of birth. with 74,000 of those, the smart attack takes approximately 1.5 hours. if still unsuccessful, the full brute force of the rest of the passcodes is initiated. (note: passcode recovery runs at the speed of 6.6 passcodes per second on the iphone 4).
