What's New In?

OLS PE (OEM Logo Stamper Professional Edition) is a special version of OEM Logo Stamper which was designed and developed for professionals who build lots of computers and want to put the branding information on those computers with minimal effort. OLS PE (OEM Logo Stamper Professional Edition) allows you to create branding information for any computer model, then save the information into a customizable format. It can also be auto deployed into a large number of computers in a short time. Furthermore, it has a group-save and recovery option which can be used to manage different branding information of different models into different files. In addition to the standard features, OLS PE has customized profile saving and loading option which is a great way to manage different branding information of different models into different files, auto deployment distribution which makes small standalone distribution of selected profile to a floppy or CD, which can be deployed easily with just a single click to target computers, and OLS PE also has other advanced windows branding options. This page explains how to use OLS PE in details. How to install OEM Logo Stamper Professional Edition Unzip the downloaded OLS PE.zip file and install it to the system where you want to save the profile. Note: If you want to distribute the branding information to many computers at the same time, a small standalone software is required. We recommend you to use the auto deployment function. For details please refer to the user guide. Start the OLS PE (OEM Logo Stamper Professional Edition) software, you can also launch it from the Start menu. You can use the OLS PE (OEM Logo Stamper Professional Edition) software to save the branding information into a profile file which you can use to replace the original branding information of your computer. Use the Advanced Settings option to customize the branding information you want to save. Then click the Save button. To create a shortcut for this application, copy the shortcut file (v_tasks.lnk) to the Startup folder or desktop to save your time in launching this application in the future. How to use OEM Logo Stamper Professional Edition Step 1: Click the Windows Start menu button and select the menu item "E-mail" in the left-hand column. Step 2: Select the E-mail program used in your system. For example, if you are using the Outlook software, go to "File" > "Account Settings" > "E-mail" in the menu bar of the Outlook program. Step 3: Select the "Profile" option in the left column and then choose the "Create a new profile" option in the right column. Step 4: Fill in the "Profile Name" option in the upper left corner of the new profile window. Then click the "OK" button. Step 5: Select the profile you want to create
